

Important Upgrade Information ProTOP/CI Version 4.x to ProTOP Version 5.x

When upgrading from ProTOP/CI version 4.x to ProTOP version 5.x, it is highly recommended to follow the procedure given below.

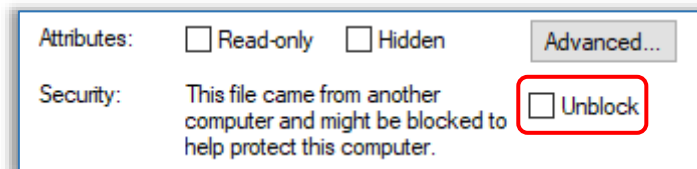

1 Close applications

- Close ProTOP/CI [[ProTOP/CI.exe](#)] if it is running
- Close License Service Manager [[CaessLMSvcMng.exe](#)] if it is running

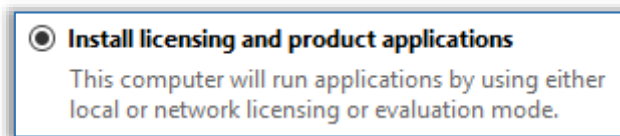

IMPORTANT. Do NOT do any changes to your Caess licensing system.

2 Run installer

IMPORTANT. Verify that the downloaded zipped installer was unblocked before it was unzipped [**File Explorer** → zipped installer file properties → **Unblock**]:

- Run the installer and select the recommended option:

Important background information

- Version 5.x is a fundamental renewal of version 4.x. Consequently, version 5.x is **not backwards compatible** with version 4.x.
- The installer will setup version 5.x in **parallel** with version 4.x. After installation **both versions can be run**, but version 5.x is the default option.
- Since ProTOP/CI is discontinued as of version 5.x, ProTOP version 5.x will run also on an **existing ProTOP/CI license**.
