

Important Upgrade Information ProTOp Version 5.x to ProTOp Version 6.x

When upgrading from ProTOp version 5.x to ProTOp version 6.x, it is highly recommended to follow the procedure given below.

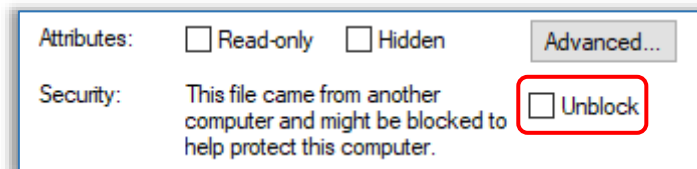

1 Close applications

- Close ProTOp [[ProTOp.exe](#)] if it is running
- Close License Service Manager [[CaessLMSvcMng.exe](#)] if it is running

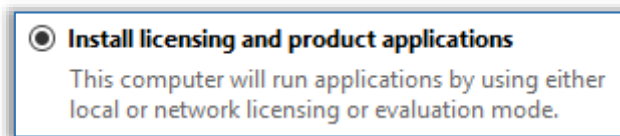

IMPORTANT. Do NOT do any changes to your Caess licensing system.

2 Run installer

IMPORTANT. Verify that the downloaded zipped installer was unblocked before it was unzipped [**File Explorer** → zipped installer file properties → **Unblock**]:

- Run the installer and select the recommended option:

Important background information

- Version 6.x is a substantial renewal of version 5.x. Consequently, version 6.x is **not backwards compatible** with version 5.x. **However**, version 6.x **enables importing** of **design** and **model data** from version 5.x projects into new version 6.0 projects.
- The installer will setup version 6.x in **parallel** with version 5.x. After installation **both versions can be run**, but version 6.x is the default option.
