

## Important Upgrade Information ProTOp Version 6.0 to ProTOp Version 6.x

When upgrading ProTOp from version 6.0 to a newer version 6.x, the installer will **overwrite** the existing version.

### Important background information

- Version 6.x is a moderate upgrade of version 6.0. Consequently, version 6.x is **backwards compatible** with version 6.0.
- The installer will **overwrite** version 6.0 with version 6.x. After installation, **only the later version 6.x can be run.**
